

# Отчёт по лабораторной работе №5 (продолжение)

МВИКУЮ КРИСТИАН КРИСТОФЕР

2026-04-16

## Реферат

**Отчёт содержит:** 8 страниц, 10 иллюстраций.

**Ключевые слова:** GitHub Pages, Jekyll, научные ресурсы, ORCID, Google Scholar, ResearchGate, персональные проекты.

**Аннотация:** В данной лабораторной работе на персональный сайт были добавлены ссылки на научные и библиометрические ресурсы (eLibrary, Google Scholar, ORCID, Mendeley, ResearchGate, Academia.edu, arXiv, GitHub). Также создана страница с персональными проектами. Добавлены два новых блоговых поста: обзор прошедшей недели и пост о языках научного программирования.

## Содержание

## Введение

После добавления на сайт информации о навыках, опыте и достижениях, следующим этапом стало размещение ссылок на научные и библиометрические ресурсы. Это необходимо для

создания профессионального академического присутствия в интернете и интеграции с научным сообществом.

## Основная часть

### Цель работы

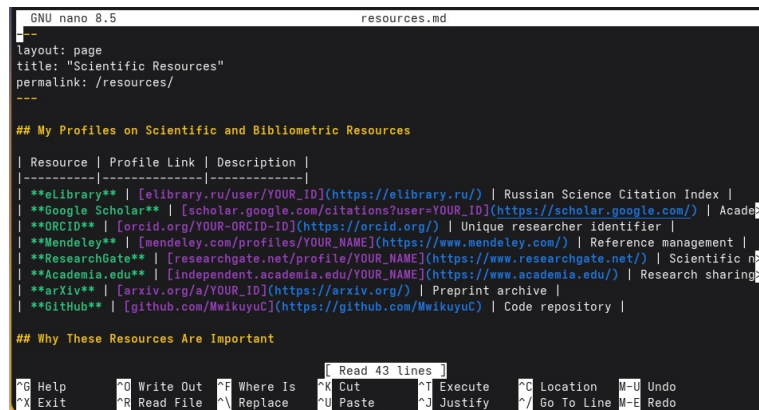

Добавить на персональный сайт ссылки на научные и библиометрические ресурсы, создать страницу с персональными проектами, а также добавить новые блогговые посты.

### Задачи

1. Зарегистрироваться на научных ресурсах (eLibrary, Google Scholar, ORCID, Mendeley, ResearchGate, Academia.edu, arXiv)
2. Создать страницу resources.md со ссылками на профили
3. Создать страницу projects.md с описанием персональных проектов
4. Обновить навигационное меню в \_config.yml
5. Создать пост о прошедшей неделе
6. Создать пост о языках научного программирования
7. Опубликовать изменения на GitHub Pages

### Добавление ссылок на научные ресурсы

Для добавления ссылок на научные ресурсы был создан файл resources.md с таблицей, содержащей названия ресурсов, ссылки на профили и краткое описание каждого ресурса.

```
GNU nano 8.5 resources.md
--
layout: page
title: "Scientific Resources"
permalink: /resources/
--

## My Profiles on Scientific and Bibliometric Resources

| Resource | Profile Link | Description |
|-----|-----|-----|
| **eLibrary** | [elibrary.ru/user/YOUR_ID](https://elibrary.ru/) | Russian Science Citation Index |
| **Google Scholar** | [scholar.google.com/citations?user=YOUR_ID](https://scholar.google.com/) | Academic research |
| **ORCID** | [orcid.org/YOUR-ORCID-ID](https://orcid.org/) | Unique researcher identifier |
| **Mendeley** | [mendeley.com/profiles/YOUR_NAME](https://www.mendeley.com/) | Reference management |
| **ResearchGate** | [researchgate.net/profile/YOUR_NAME](https://www.researchgate.net/) | Scientific network |
| **Academia.edu** | [independent.academia.edu/YOUR_NAME](https://www.academia.edu/) | Research sharing |
| **arXiv** | [arxiv.org/a/YOUR_ID](https://arxiv.org/) | Preprint archive |
| **GitHub** | [github.com/MwikuyuC](https://github.com/MwikuyuC) | Code repository |

## Why These Resources Are Important
```

Создание страницы resources.md

### Создание страницы персональных проектов

Был создан файл projects.md, содержащий информацию о выполненных проектах:

- Персональный сайт на GitHub Pages
- Git-репозиторий для курсовых работ

- Лабораторные отчёты в Markdown
- Настройка Fedora Linux в VirtualBox

```

GNU nano 8.5 projects.md

---
layout: page
title: "Personal Projects"
permalink: /projects/
---

## My Projects

### 🌐 Personal Website
**GitHub Pages + Jekyll** | *2026 - Present*
- Built a static website hosted on GitHub Pages
- Customized Jekyll theme with personal information
- Added blog posts about Git, Markdown, and CI/CD
- [View Source](https://github.com/MwikuyuC/MwikuyuC.github.io)

### 📁 Git Repository for Coursework
**Git + GitHub** | *2026*
- Created 'git-extended' repository with git-flow workflow
- Implemented semantic versioning (v1.0.0, v1.2.3)
- Set up conventional commits with commitizen
- Automated changelog generation with standard-changelog
  
```

Создание страницы projects.md

## Обновление навигационного меню

В файл \_config.yml были добавлены новые страницы в раздел header\_pages:

header\_pages:

- about.md
- education.md
- resources.md
- projects.md

```

GNU nano 8.5 _config.yml

# Social links
github_username: MwikuyuC

# Build settings
theme: minima
plugins:
  - jekyll-feed
  - jekyll-seo-tag

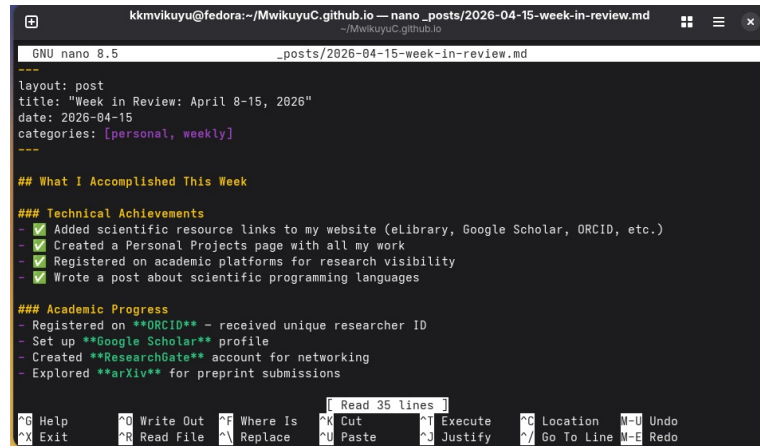

# Navigation
header_pages:
  - about.md
  - education.md
  - resources.md

# Navigation
header_pages:
  - about.md
  - education.md
  - resources.md
  - projects.md

# Exclude from processing
exclude:
  - Gemfile
  - Gemfile.lock
  - vendor
  
```

## Создание поста о прошедшей неделе

Был создан файл `_posts/2026-04-15-week-in-review.md` с обзором прошедшей недели. В посте описаны технические достижения, академический прогресс и планы на следующую неделю.

```
GNU nano 8.5 _posts/2026-04-15-week-in-review.md

layout: post
title: "Week in Review: April 8-15, 2026"
date: 2026-04-15
categories: [personal, weekly]
---

## What I Accomplished This Week

### Technical Achievements
- [x] Added scientific resource links to my website (eLibrary, Google Scholar, ORCID, etc.)
- [x] Created a Personal Projects page with all my work
- [x] Registered on academic platforms for research visibility
- [x] Wrote a post about scientific programming languages

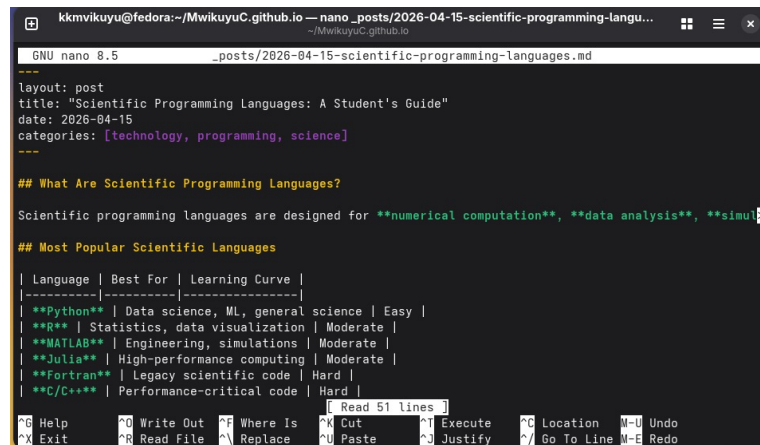

### Academic Progress
- Registered on ORCID - received unique researcher ID
- Set up Google Scholar profile
- Created ResearchGate account for networking
- Explored arXiv for preprint submissions

```

Пост о прошедшей неделе

## Создание поста о языках научного программирования

Был создан файл `_posts/2026-04-15-scientific-programming-languages.md`, посвящённый языкам программирования, используемым в научных исследованиях. В посте рассмотрены Python, R, MATLAB, Julia, Fortran и C/C++.

```

## What Are Scientific Programming Languages?

Scientific programming languages are designed for numerical computation, data analysis, simulation

## Most Popular Scientific Languages

| Language | Best For | Learning Curve |
|-----|-----|-----|
| Python | Data science, ML, general science | Easy |
| R | Statistics, data visualization | Moderate |
| MATLAB | Engineering, simulations | Moderate |
| Julia | High-performance computing | Moderate |
| Fortran | Legacy scientific code | Hard |
| C/C++ | Performance-critical code | Hard |

## Заключение

В ходе выполнения лабораторной работы были достигнуты следующие результаты:

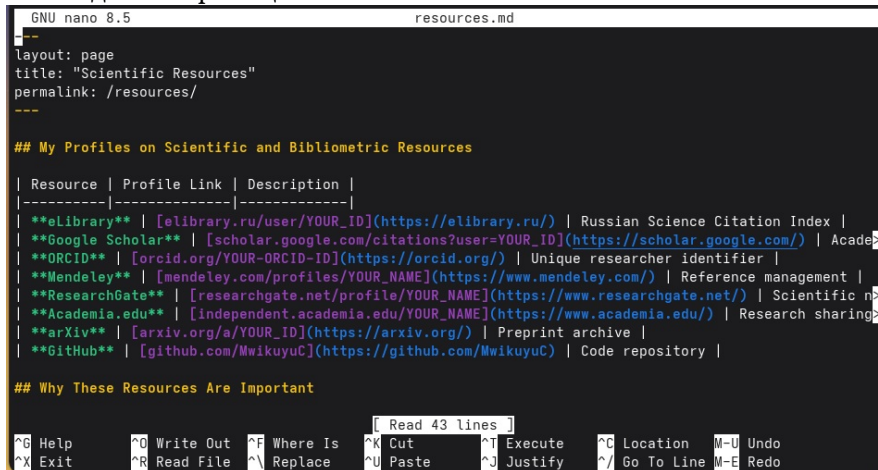

1. **Создана страница научных ресурсов** с ссылками на eLibrary, Google Scholar, ORCID, Mendeley, ResearchGate, Academia.edu, arXiv и GitHub.
2. **Создана страница персональных проектов** с описанием выполненных работ.

3. **Обновлено навигационное меню** сайта для доступа к новым страницам.
4. **Создан пост о прошедшей неделе** с описанием технических достижений и академического прогресса.
5. **Создан пост о языках научного программирования** с обзором Python, R, MATLAB, Julia, Fortran и C/C++.
6. **Все изменения опубликованы** на GitHub Pages.

Персональный сайт доступен по адресу: <https://MwikuyuC.github.io>

# Student's Guide

Apr 15, 2026

## What Are Scientific Programming Languages?

Scientific programming languages are designed for **numerical computation**, **data analysis**, **simulation**, and **research** applications. Unlike general-purpose languages, they excel at matrix operations, statistical analysis, and visualization.

## Most Popular Scientific Languages

| Language | Best For                          | Learning Curve |
|----------|-----------------------------------|----------------|
| Python   | Data science, ML, general science | Easy           |
| R        | Statistics, data visualization    | Moderate       |
| MATLAB   | Engineering, simulations          | Moderate       |
| Julia    | High-performance computing        | Moderate       |
| Fortran  | Legacy scientific code            | Hard           |
| C/C++    | Performance-critical code         | Hard           |
